### Background

Asian Mycological Congress (AMC) is currently held every two years. This is an international scientific forum open to mycologists from Asia and all over the world. AMA provides a platform for scientists working on research areas related to fungi to present their results in the form of oral presentations and posters, to discuss their research findings with scientists working in a related field, and to establish possible collaborations with international participants.

The 13<sup>th</sup> International Marine & Freshwater Mycology Symposium will be co-held with Asian Mycological Congress 2013 in Beijing.

The Congress will include plenary sessions, symposia, and special interest group (SIG). The programs will cover, but not limited to, the following topics in basic and applied mycology. Bursary will be provided to persons from developing countries who need a financial assistance to attend this congress.
